- Worked under an interpretation agreement with UNDP.
- Posted a small book on a sample Oyunsuren’s version new interpretation, Children’s Psychology and Service.

Brief introduction of consultancy service

The objective of the consulting is dedicated to mindset shift and behavior change. With good knowledge, everyone can contribute to a brighter world and the planet. It consults how to react toward negative situations, to be role models of goodness for negative people so that they can see and change themselves, and how to gain wisdom and become wisdom- lover. If the world is filled with wise people, they will consume wisely so all negativity made by human activity will disappear or be corrected. It also consults healthy food and nutrition.

I interpreted Oyunsuren’s version interpretation of the bible.

<https://www.youtube.com/@MsOyuoyu/videos>

It encourages everyone to improve their abilities for cognitive, emotional and physical well-being. Human abilities include hearing and understanding word ability, remembering what he knows and understands, good eyesight ability, speaking ability, desiring goodness, red and white cell development ability in blood, and transforming HO₂ received by nostril into CO₂. It teaches how to control own reaction/ dealings with others since one can not control choice, decision or treatment of another. Particularly, it highlights positive dealings with negativity.

In connection with positive dealings, Oyunsuren initiated eco friendly innovations against climate change. It is like restoration of human abilities and based on developed ability, restore the environment and ecosystem. Human abilities include breathing, hearing ability, eyesight, understanding word correctly, hoping to achieve long term peaceful result, red and white cell development within blood, remembering what he know ability, speaking of what he feel ability and digesting what he ate ability and let it be eliminated. If there is air but if man can not breath, it is loss of ability. If there is food but he does not want to eat or can not eat due to disease, it is loss of ability. If one used to believe there is goodness in the world but he changed belief there is nothing good here, it is loss of ability to believe.

I advocate that difference between aggressive and unaggressive attitude and healthy food diet. Cause of man turning unaggressive when being aggressive before is ability to blame his own wrong doing. What man should blame himself include that he should not have doubted to person who told him truth; he should not have misinterpreted and misunderstood another person's words and actions as if he know another better than another person know himself when no one think and feel for another; he should not have made continuous effort by ignoring change in situation and failed to be adopted in the change and know when to stop, restart or discontinue; he should not have insulted or underestimated by feeling himself better than another when another is kind to him; he should not have deceived or cheated another when another is loyal to him; he should not have hidden himself or taken things secretly when another is willing to give only when being asked; he should not have told lie to hide own weakness when another trusts him; he should not have been angry without cause even want to kill another based on hate; he should not have wanted more and unhappy or not proud to have things and person as His/ Mine when another proud to have him as His own; he should not have liked money or belongings more than another's love, loyalty, care, true advice and good deeds for him. Those are reasons man should blame himself that he should not have ever done. If any man realizes those wrong deeds, it will be deemed Mindset shift for him/her. If he realized and willing to ask advice on correction, answer out of wise person's mouth is deemed knowledge management for him/her.

Restoration is to restore man's long-lost abilities. Everyone seeks wise words and fairness but few find real wisdom and go through real fairness. When their needs to hear wise word and go through fairness is unsatisfactory, people start losing ability to believe in goodness and understand word correctly. Due to loss of abilities, they doubt, suspect each other, hide what has happened, tell lie to hide own mistake, do not want to admit own mistake, if feel something is wrong, do not know what to do to deal with it. Those are side effect of their needs are unsatisfied. As result of feeling doubt, suspect and hurt, they treat environment and ecosystem badly. So it is restoration cycle including human needs to hear wise words and witness fairness.

Achievements

1. In 2022, awarded a contract with UNDP as a vendor for translation and interpretation

2. In 2023, being registered as a partner by submitting registration of vendor entity to USAID through sam. Gov, which vendor registration process has been completed and registered
